

# Seminar “TRADE for a LIVING”

---

## Nivel Intermediar & AVANSAT

Organizat in ARAD in Parteneriat cu IFB Finwest

22 & 23 August 2009

### Misiunea acestui Seminar AVANSAT:

---

#### 1. Prezinta “scule” – trading tools – avansate & originale, folosite individual sau in sinergie cu altele!

---

Scopul acestui Seminar este sa pregateasca cursantul sa devina un Trader competent in comparatie cu ceilalti traderi profesionisti care tranzactioneaza cu un capital de milioane de dolari si reprezinta « *Smart Money* » - Bani Inteligenti - pe Bursele Internationale.

O sa va introducem in lumea lor, divulgand astfel cum tranzactioneaza ei profitabil, cum este posibil in prima faza sa-i identificam pe piete si apoi sa incercam sa devenim unul dintre ei. « Sculele » noastre, in mare parte sunt originale, si nu pot fi gasite in alte materiale de trading, astfel avind aici un rol major !!!

Va vom fi alaturi prin etapele multiple ale acestor metode de invatare de trading, la inceput in cadrul seminarului si apoi in cadrul Asistentei Gratuite in urmatoarele 12 luni – astfel continuind sa « *raminem aproape* » de Dv.

---

---

#### 2. Construirea Increderei in Sine

---

Tehnica noastra de trading prezentata in acest seminar o sa va sprijine in prevenirea multor “*trepidatii*” si nelinisti psihice, eliminand astfel frica de a efectua un trade, din cauza unor pierderi eventuale de capital. Cum conditia psihica a trader-ului reprezinta mai mult de 85% din reusita lui, asimilarea optima a materialului de trading este indispensabila. Astfel, trader-ul poate construi sau re-construi bazele fiabile si eficiente ale propriului trading, care vor proteja trader-ul de decizii improvizate, precum si de rezultate dezaastroase, ducind la pierderea capitalului.

---

#### 3. Procedura de Risk & Money Management – devine un gest-reflex de trading

---

In concluzie putem spune, ca totul revine in a trage concluzia ca tradingul PROFITABIL nu este altceva decit marea diferenta care exista intre doua situatii extreme : o pierdere minimala - “*bani marunti*” in medie – si un cistig substantial constant.

In aceasta optica, printre alte subiecte importante, seminarul o sa sublinieze importanta procedurii de a folosi un singur *trading unit* sau de a adauga - *Adding* sau *Scale In* - mai multe unitati de trading, fie ele Actiuni sau Contracte de Futures.

Acest lucru reprezinta in mod frecvent *legatura care lipseste* – « *the missing link* » - in cadrul trading-ului profitabil in mod constant.

---

# **CONTINUT :**

## **ZIUA n° 1**

---

### **1. Pre-OPEN PREPARATION**

- Influences of External Fundamentals in Markets
- Influences of Internal Fundamentals in Markets
- Key Level Mapping – Operational Time Frame Chart
- Volatility Side of Pre-Open Market
- Pre-Open Main Points
- Weekly Top-Down Analysis

### **2. INTER-MARKET ANALYSIS**

- Dynamic Mechanisms of Stock Indices
- Dynamic Mechanisms of currencies: Local & World-wide
- Dynamic Mechanisms of Energy Markets
- Professional Tools of Inter-Markets Analysis

### **3. ELLIOTT WAVES**

- Basic Theory
- Impulsive Waves (W1 to W5)
- Corrective Waves (ABC & Complex Patterns)
- Termination of W3, W5 & ABC
- Fibonacci Price Ratios: Miner & Fisher
- Trend Lines in Elliott Waves

### **4. CHANNELLING in MARKETS**

- W1 Formation
- W2 & W3 Channelling
- W4's 2-4 Base-Line & OSC (5, 35)
- Regression Trend Channel
- Indicators & Elliott Waves
- Elliott Waves Trades

### **5. FIBONACCI & MOMENTUM BAR COUNTS**

- Fibonacci Successive Bar Count
- Bar Count Grid
- Momentum Bar Count
- Dual Bar Count

### **6. OSC (5, 35) and Trending**

- Definition as a Trending Tool
- Overbought & Oversold Conditions
- Divergences as Reversing Tools
- Failure Swings
- Chart Patterns
- Elliott Waves Labelling Confirmation

## **7. FLOOR PIVOT & Mark Fisher PIVOTS**

- Floor Pivot Concept
- Multiple Time Frames
- Trading Strategies
- Elliott Waves & Floor Pivots

## **8. TIME TOOLS: Fibonacci, Lucas & Gann**

- Time leads Price fuelled by Volume
- Fibonacci Time Ratio Lines
- Fibonacci Time Ratio Clusters
- Fibonacci & Lucas Time Clusters
- Elliott Waves & Time Tools
- Gann Time Tools

## **9. WOLFE WAVES**

- General Description
- Projecting the Termination of Swings (*Time & Price*)
- Wolfe Waves Guided by Fibonacci Price Ratios
- Fine Tuning in Trading Wolfe Waves

## **10. INTRA-DAY JENKINS TOOLS**

- Characteristics
- Jenkins Angles
- Arcs, Demi-Circles & Circles
- Jenkins True Trend Lines – JTTL

## **11. GANN TOOLS in Real Time**

- Gann Trading Approach
- Gann Angle Landmarks
- Gann Boxes
- Gann Percentage Tools
- Gann Wheel or Square of Nine (*Price*)
- Gann Wheel or Square of Nine (*Time*)

## **12. CASE STUDIES - RISK & MONEY MANAGEMENT**

*Complete case descriptions: simple or pre-arranged entry, stop loss' parsimonious size, targets, Reward/Risk ratios, trails, scale in, scale out, exits, nibbling and single/multiple trading units.*

- Three Pawn Technique: *Risk & Money Management Technique*
- Pitchfork-related Trade
- Bar Counts - W3 Trade
- Floor Pivots Trade
- Fibonacci & Lucas Time Trade
- Wolfe Wave Trade
- Jenkins JTTL & Angles Trades
- Gann-related Trade

**IMPORTANT:** *Se poate obtine la cerere de catre cursanti , manualul in fisier electronic, format pdf.*
